## EDUCATION

**MS in Computer Science** | Georgia Institute of Technology | GPA: 4.0/4.0

**Aug 2021 — May 2023**

- **Specialization:** Machine Learning
- **Courses:** Graduate Algorithms, Computer Vision, Machine Learning, Natural Language, Deep Learning, Artificial Intelligence
- **Graduate Teaching Assistant:**
  - CS 7641: Machine Learning (Fall 2022, Spring 2023)
  - CS 4400: Introduction to Database Systems (Fall 2021, Spring 2022)

**B.Tech in Computer Science** | National Institute of Technology - Tiruchirappalli | GPA: 8.18/10.00

**Jul 2014 — May 2018**

- **Courses:** Data Structures and Algorithms, Operating Systems, Database Management Systems, Computer Networks.

## WORK EXPERIENCE

### Meta

**Menlo Park, CA**

Software Engineer | Reality Labs

Oct 2025 — Present

- Building full-stack health and wellbeing features across mobile and wearables, collaborating closely with product and research teams to deliver impactful health experiences for millions of Meta wearables users.

Software Engineer | Instagram

Nov 2023 — Sep 2025

- Built backend systems for story ad and creative features, developing data pipelines and running experimentation to inform feature launches to billions of users.
- Contributed to infrastructure, reliability, and performance improvements across Instagram's backend systems.

### Athelas

**Mountain View, CA**

Software Engineer

June 2023 — Nov 2023

- Built backend systems for Athelas's AI-powered Revenue Cycle Management platform (RCM), enabling automated end-to-end healthcare billing and payment workflows including claims, EHR integration, and denial management.

### Iron Mountain

**Bangalore, India**

Machine Learning Engineer | Insights

Sep 2020 — Jun 2021

- Developed and patented a human-in-loop, event-driven GCP pipeline for Document Understanding tasks, leading to significant savings and broad application across company divisions. [link]
- This role entailed collaborating with product teams, delivering weekly analyses, and overseeing the pipeline's design, deployment, and maintenance.

### Samsung Research India

**Bangalore, India**

Senior Software Engineer | IoT Products and Platforms

Jun 2018 — Aug 2020

- Demonstrated strong algorithmic competency, earning the Samsung professional certification and contributing significantly to research, commercialization, and debugging efforts for Home Monitoring solutions integrated with SmartThings.
- Led a research proposal on identifying anomalous segments in surveillance videos using C3D for spatiotemporal feature extraction, successfully presenting the paper at an IEEE conference. [link]
- Developed an SDK for IoT devices to enable efficient peer-to-peer communication using WebRTC, reducing latency, server costs, and privacy concerns, while integrating the solution on devices such as surveillance cameras and robot vacuum cleaners.
- Received a spot award for developing an emergency home audio monitoring engine to detect common household sounds, successfully integrating it into the Galaxy home assistant and presenting the innovation at a workshop in Korea.[link]

## RECENT PROJECTS [LINK]

**opensports.ai | Sports Analytics with AI** [link]

**2025**

- Building a web app that allows users to explore sports statistics in natural language via a fine-tuned LLM-to-SQL engine.
- Designed and deployed the full-stack system on GCP with weekly data refresh pipelines, intelligent charting, and human-in-the-loop model refinement.

**evadb | Exploratory Video Analytics** [project link] [paper link]

**2023**

- Contributed to EVA, an open-source AI-relational database enabling efficient querying over structured and unstructured data using deep learning models.
- Implemented SQL-like query support for videos and images, with relational database-inspired optimizations such as function caching, sampling, and cost-based operator reordering to accelerate deep learning pipelines.
